

GENERAL STATEMENT OF POLICY

In making decisions regarding student and staff access to the school district computer system and the Internet, including electronic communications, the school district considers its own stated educational mission, goals, and objectives. Electronic information research skills are now fundamental to preparation of citizens and future employees. Access to the school district computer system and to the Internet enables students and staff to explore thousands of libraries, databases, bulletin boards, and other resources while exchanging messages with people around the world. The school district expects that faculty will blend thoughtful use of the school district computer system and the Internet throughout the curriculum and will provide guidance and instruction to students in their use. This agreement is in accordance with policy and procedure 2022.

LIMITED EDUCATIONAL PURPOSE

The school district is providing students with access to the school district's computer system, which includes Internet access. The purpose of the system is more specific than providing students with general access to the Internet. The school district system has a limited educational purpose, which includes use of the system for classroom activities, professional or career development, and limited high-quality, self-discovery activities. Users are expected to use Internet access through the district system to further educational and personal goals consistent with the mission of the school district and school policies. *Uses which might be acceptable on a user's private personal account on another system may not be acceptable on this limited purpose network.*

Montesano School District No. 66
Electronic Resources – Policy 2022

The Montesano Board of Directors recognizes that an effective public education system develops students who are globally aware, civically engaged, and capable of managing their lives and careers. The board also believes that students need to be proficient users of information, media, and technology to succeed in a digital world.

Therefore, the district will use electronic resources as a powerful and compelling means for students to learn core subjects and applied skills in relevant and rigorous ways. It is the district's goal to provide students with rich and ample opportunities to use technology for important purposes in schools just as individuals in workplaces and other real-life settings use these tools. The district's technology will enable educators and students to communicate, learn, share, collaborate and create; to think and solve problems; to manage their work; and to take ownership of their lives.

The superintendent or designee will create strong electronic educational systems that support innovative teaching and learning, to provide appropriate staff development opportunities and to develop procedures to support this policy.
